1

Library Extension is a Chrome extension that allows you to see public library availability when you are browsing for books online on sites like Amazon, Goodreads, and Barnes & Noble. The extension allows you to borrow and place books on hold directly from the site you are browsing. Save money! Why buy the book when you can check it out for free?

Alternatives to Microsoft Publisher

With the increase of Chromebooks in the district, it's time to get away from relying on Microsoft Publisher as a tool for students to use when creating pamphlets and other projects that require graphic design. Two of our favorite free, online, graphic design tools are **Canva and LucidPress**. Both allow sign up / log in with Google, are easy to use, and have plenty of tutorials and examples to help users create the perfect product.

EdCamp St. Louis - Saturday, Feb. 11

Edcamp is a form of unconference designed specifically for teachers and their needs. It features an agenda that's created by the participants at the start of the event. All of the space and time are reserved for the things the people there want to talk about. Participants are encouraged to have discussions and hands-on sessions. The best part of EdCamp? It's free! It also includes free breakfast and lots of opportunities for prizes. Can't make the conference, follow #EdcampSTL on Twitter the day of the event. Get more info and [register using this link](#).
